

GREEN:EXPO

GreenEnergy

energyGRID

23-24/05/ 2024

Program of events:

- exhibition area
- forum from the organizers
- thematic seminars from participants
- drawings of gifts from partners
- strategic sessions
- networking

MOVING IN THE EUROPEAN DIRECTION OF THE GREEN COURSE

THEMATIC AREAS OF THE EXHIBITION:

SOLAR ENERGY

- Solar panels and solar systems
- Highly efficient photovoltaic panels
- Innovative solar tracking systems to increase energy output
- Mounting systems and equipment
- Software
- Integrated systems for buildings and structures

WIND POWER

- Project planning and development
- Wind turbines (horizontal and vertical)
- Monitoring and diagnostic systems for wind power plants
- Wind pumps
- Suppliers of equipment and components
- Installation, operation and maintenance

COMPONENTS AND EQUIPMENT FOR ALTERNATIVE AND DISTRIBUTED ENERGY SOURCES INFRASTRUCTURE

- Inverters
- Charge controllers and chargers
- Batteries and electric energy storage systems
- Control automation and monitoring
- Generators and uninterruptible power supply systems
- Energy transmission systems, which include wires, substations and infrastructure for connecting alternative and distributed energy sources to the general network

SMART SYSTEMS AND MICROGRIDS, INNOVATIONS IN THE DISTRIBUTION, USE AND STORAGE OF ENERGY

- Microgrid management systems for power generation
- Integration with remote monitoring systems
- Systems for remote monitoring of energy consumption and production
- Platforms for optimizing distributed generation management
- Smart meters
- Smart transformers equipped with sensors and monitoring systems for quick fault detection and repair
- Artificial intelligence and data analytics (for load forecasting, system optimization, and quick detection of anomalies)

HEAT POWER AND BIOFUELS

- Technologies for the use of geothermal heat for power generation and heating
- Cogeneration and trigeneration power plants
- Recuperation equipment - Infrared heating
- Heat pumps and systems - Solar collectors and systems
- Heat exchangers - Solid fuel boilers
- Modular heating stations
- Solid biofuel boilers - Fuel pellets and briquettes
- Equipment for the production of fuel pellets and briquettes
- Technologies and equipment for shredding wood waste

ECOTOWN AND ENERGY-SAVING TECHNOLOGIES

- Energy efficient building materials and systems
- Products made from recycled materials
- Passive House and Smart Home technologies
- Insulation and insulation materials
- Energy-saving facades, windows and doors
- Financial institutions and the insurance market
- Electric vehicle technologies (charging stations for electric vehicles, developments for the use of electric vehicles and energy saving systems)
- Integration with electric vehicle technologies

PROGRAM OF THE EXHIBITION:

GREEN:EXPO

**FORUM
FROM THE ORGANIZERS**

**STRATEGIC SESSIONS
FROM PARTNERS**

**SEMINARS FROM
PARTICIPANTS**

**GIFT DRAWINGS
AND NETWORKING**

**TAKE ADVANTAGE OF THE OPPORTUNITY-
BECOME A PARTICIPANT OF THE INDUSTRY EVENT!**

CONDITIONS OF PARTICIPATION IN THE EXHIBITION AREA :

Registration fee: 5000 UAH*.

**EQUIPPED AREA:
3600 UAH/sq.m.**

- Carpeting
- Power supply and lighting
- Frieze
- Furniture (depending on the size of the stand)
- Security at night

**UNEQUIPPED AREA:
2800 UAH/sq.m. (from 6 sq.m.)**

- Renting a space
- Security at night

**THE AREA ON THE STREET:
1000 UAH/sq.m.**

- Renting a space
- Security at night

Additional equipment and services are ordered separately

* price includes VAT

WE CREATE A PLATFORM FOR YOUR OPPORTUNITIES

Who is our visitor?

50%

Representatives of the business community

15%

Financial institutions, representatives of donor programs and investors

25%

Local governments, state-owned and municipal enterprises

10%

Regulators, specialized associations and the expert community

It is important to be present! Why?

- A meeting of leaders who want to change
- Thematic areas of the exhibition, prioritized for future reconstruction
- An offline platform for demonstrating your technological capabilities, where demand meets supply
- Opportunity for personal meetings and negotiations with experts, representing various industries
- Relevant content from market experts
- Dialogue of industry experts on a single offline platform - an opportunity to restart and adapt interaction processes to new conditions
- Share your experience and broaden your horizons
